The application has been amended as follows:

In the title:

The title has been deleted and replaced with --METHOD OF INJECTION MOLDING A GASKET--.

In the specification:

Paragraph 0001, line 2: the phrase --, now U.S. Patent No. 6,722,660,-- has been inserted after "November 7, 2002".

2. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor renders obvious all of the claimed limitation including injecting the gasket material to form a longitudinally extending body of the gasket having laterally opposite side surfaces and a plurality of retaining nubs spaced longitudinally from one other and projecting laterally outwardly from the opposite side surfaces of the body; forming at least one longitudinally extending ingate rib of gasket material

projecting laterally outwardly from at least one of the opposite side surfaces on the body and bridging at least two adjacent retaining nubs defining bridged retaining nubs and non-bridged retaining nubs, allowing the gasket material to cool; opening and removing the gasket from the mold; and trimming the ingate rib to form a free trimmed edge of the ingate rib that projects from the body no further than the non-bridged retaining nubs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
